

## What other people are saying about Intraceuticals

---

**Dr. Lisa Kellett**  
Consulting Dermatologist  
DLK on Avenue  
Toronto, Canada

"The Intraceuticals Oxygen Infusion Treatments are a clinic favourite due to the numerous and broad scope of benefits they offer our patients. From a lunch time lift to the perfect post-treatment procedure for ablative lasers and other advanced light and laser treatments, the Intraceuticals system offers something for everyone.

I would have to say that everyone's idea of a cosmetic procedure differs to some degree, but with the Intraceuticals system the most common thing I hear from our happy patients is that they love the instant results and the way their skin looks and feels due to the system's luminous hydrating effect."

DLK on Avenue goes beyond the traditional doctor's office. It is Toronto's only dermatology clinic that brings together the best of traditional medical treatments and the latest advancement in innovative technological therapies. DLK on Avenue offers the highest level of personalized attention and continued support, and a highly and dedicated trained team of onsite medical experts led by Dr. Kellett.

DLK on Avenue delivers the most sophisticated and effective skin treatments available today in a friendly and welcoming environment.

DLK's Intraceuticals Treatments were featured on ET Canada in March 2009 and in April 2009, DLK on Avenue was named Canada's Best Medi-Spa by Glow Magazine's Annual Spa Guide. DLK on Avenue is located at 108 Avenue Road, Toronto, Ontario.
