HOW AIDS KILLED THE SAN FRAN PARTY

## 4 THE PRE-PARTY FACIAL: Intra-ceu-ti-cals Infusion Oxygen Facial

The pre-red-carpet facial favoured by Hollywood's elite (Steven Klein, Trousersnake, Madge) involves a medically developed vitamin cocktail being driven deep into the skin with a jet of pressurised oxygen. The Photoshop effect – luminosity, lifting and smoothing – is instant, making this an absolute essential for festive occasions when you're going to have a camera shoved in your face every two seconds. The Intra-ceu-ti-cals version of the oxygen facial (the original and still the best) is now available in the UK via Renew Medica.

From £125 at Renew Medica spas, [renewmedica.com](http://renewmedica.com)
