beauty dilemmas

From an acne treatment that works, to dry skin and the ideal solution for all-day make-up, we solve your most pressing beauty issues. Plus, just what is hyaluronic acid?

1 Dehydrated skin

THE PROBLEM: Dull and very dry skin, fine lines, wrinkles, hyperpigmentation and/or blemishes.

THE ANSWER: With a long list of celebrity endorsements from Katy Perry to Miranda Kerr and Eva Longoria, the IntraCeuticals Infusion, \$120, will have you red

carpet ready in no time. For an instantly plumped and glowing complexion, the salon treatment sees a rich hyaluronic acid-based serum (the latest elixir of youth!) delivered into the skin using pressurised oxygen. Your therapist can target specific areas of concern and the range of take-home products (right) prolongs the treatment's effects. See intraCeuticals.com
