### IntraCeuticals Rejuvenate Range now Paraben-Free

IntraCeuticals has now released a new paraben-free Rejuvenate product range. IntraCeuticals' Rejuvenate range is designed for intense rehydration of the skin, and is used in conjunction with its proprietary 3-Step Hyaluronic Layering, the underpinning philosophy behind the entire IntraCeuticals product range.

At Step 1 of the process, Rejuvenate Daily Serum revives the skin from within. The serum's low molecular weight makes it the perfect vehicle for a deep delivery of carefully selected anti-ageing actives and nutrients to the skin.

Rejuvenate Hydration Gel is applied as Step 2 to replenish the skin and provide an invisible barrier against moisture loss. Rich in Hyaluronic Acid, vitamin C and vitamin E, the lightweight gel works synergistically with Rejuvenate Daily Serum to smooth fine lines and wrinkles, allowing osmotic hydration to continue.

As the third step Rejuvenate Moisture Binding Cream combats surface dehydration to nourish, moisturise and defend the skin. The active ingredients of the Daily Serum and Hydration Gel are locked into the skin by the Moisture Binding Cream, while adding anti-oxidants and wheat germ for continuous hydration and restoration of the skin's natural pH balance.
