Heidi Klum, supervising producer of Syfy's Warehouse 13, Holly Harold and Marcia Cross get the Ultimate Glow facial at Gina Mari. The procedure combines Mari's [Intraceuticals](#) Rejuvenate Infusion Treatment (a noninvasive combination of oxygen and a serum with hyaluronic acid to hydrate, increase firmness and reduce fine lines) with face and body LED light therapy. Mari is the only person in town who offers LED body light therapy, which can help smooth the décolletage area if you're planning to wear a strapless or plunging gown on Emmy night.
