EL HOTEL: WELLNESS AND BEAUTY

O2 INTRACEUTICALS AT THE WELLNESS ROOM

EL Hotel introduces the unique facial treatment O2 Intraceuticals osmotic pressure, which uses oxygen to penetrate a rich cocktail of antioxidants, minerals and vitamins deep into the skin.

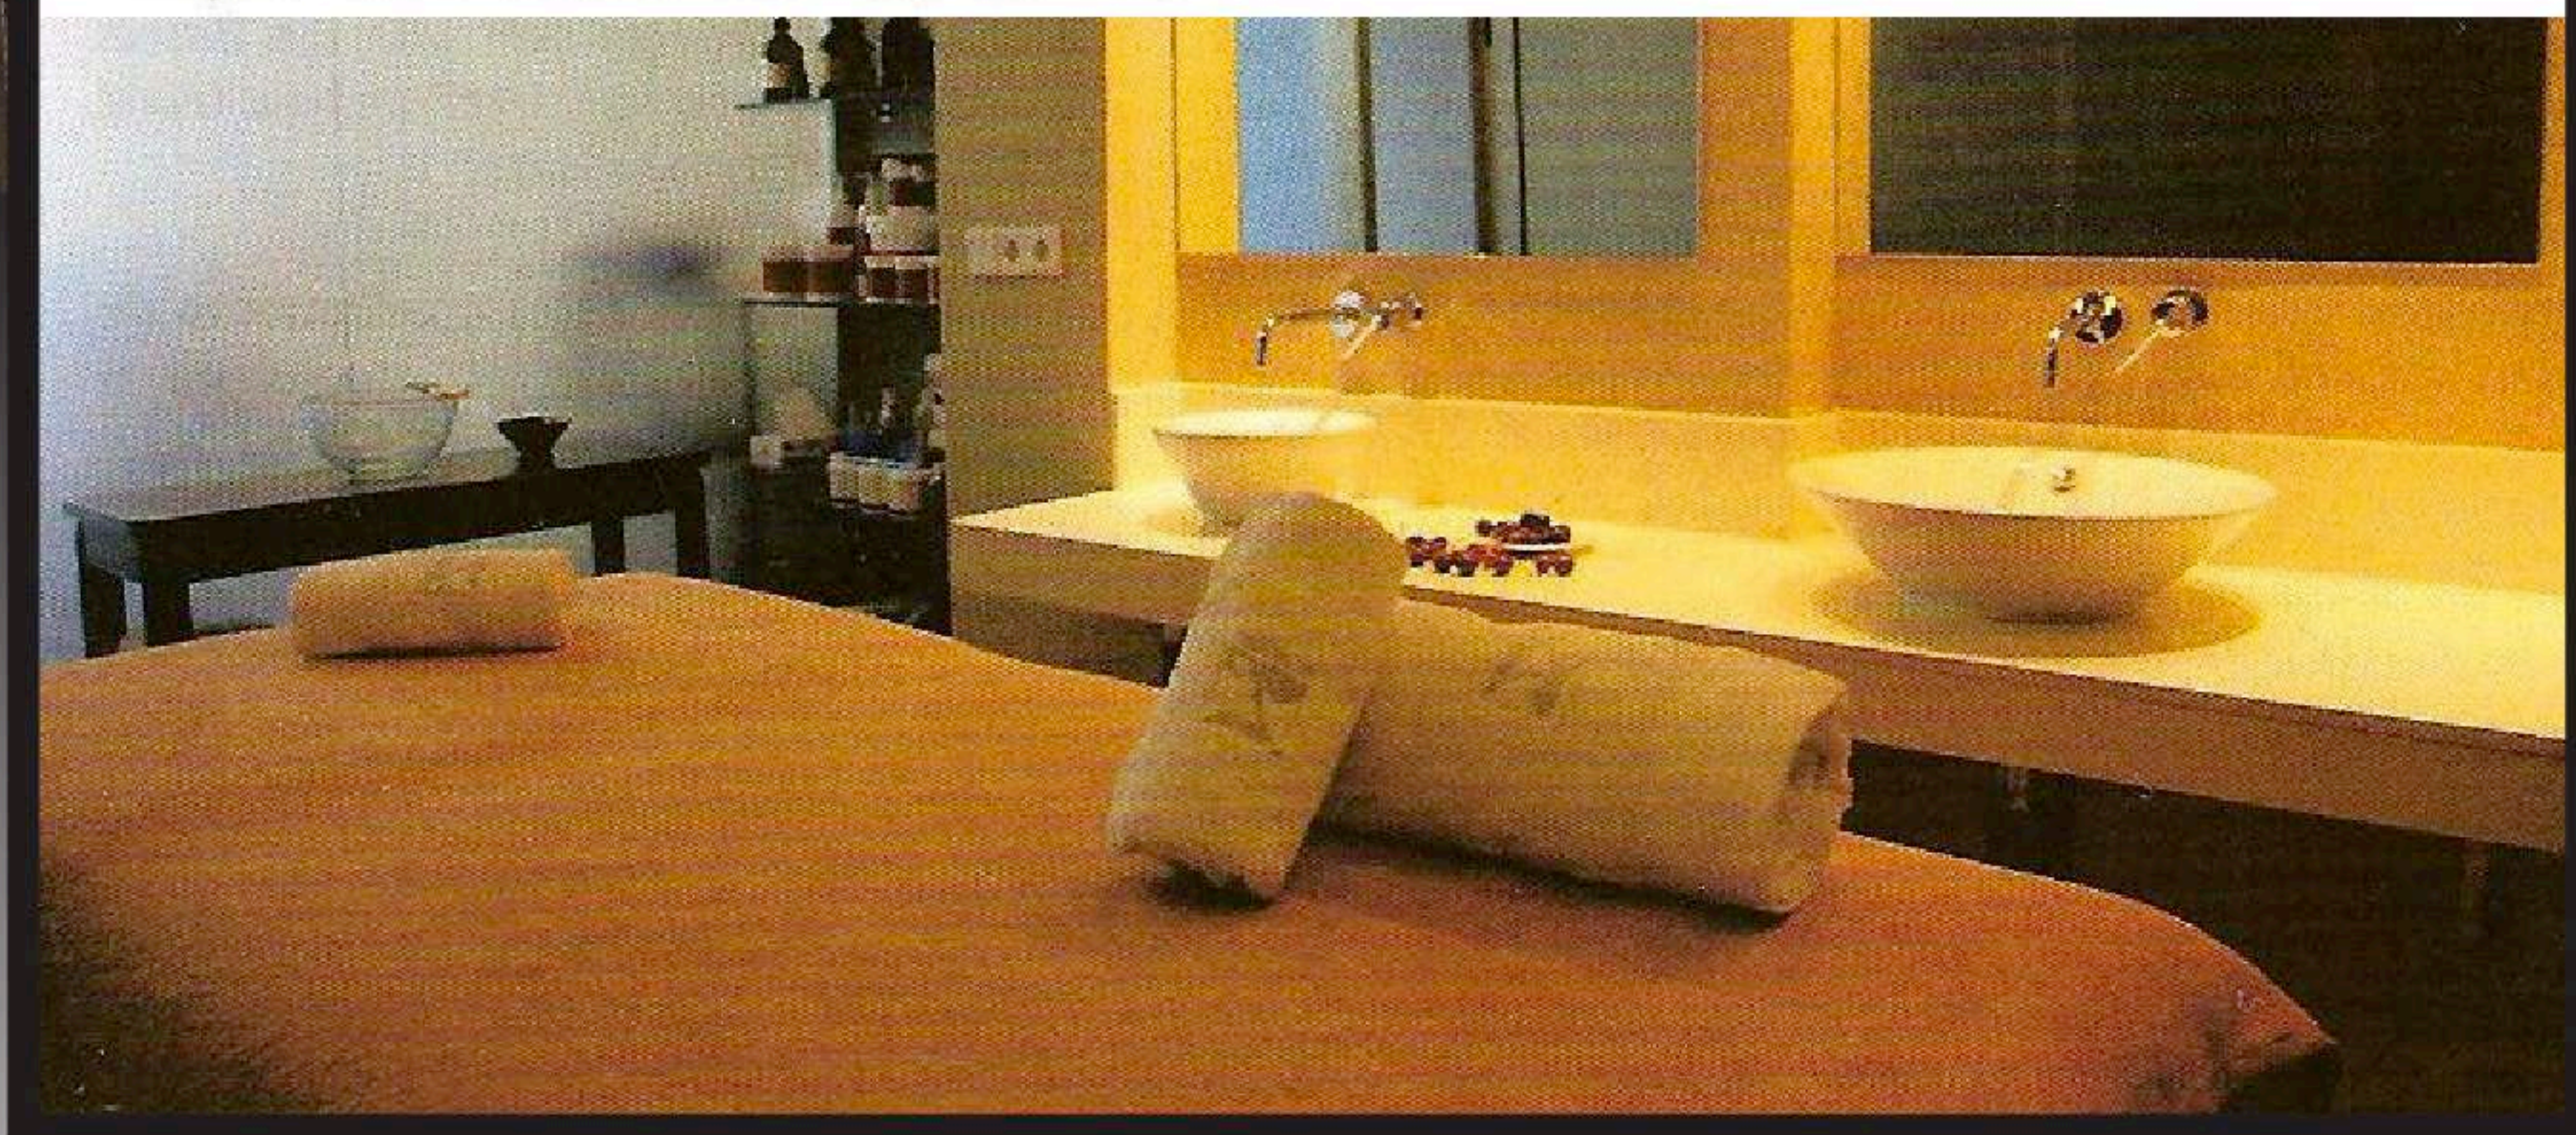

The non-surgical, non-invasive treatment boosts the production of collagen and stimulates cell function to plump and hydrate the complexion and increase radiance with instant results.

Lasting 55 minutes, the O2 Intraceuticals facial includes multiple formulas such as the age-defying Rejuvenate method; Clarity, for blem-

ish control; Atoxelene, for smoothing lines; and Opulence, for brightening the skin's appearance.

This innovative technique is popular with celebrities and dermatologists in high profile spas around the world while high-profile skincare professional Michelle Peck has been instrumental in sharing the O2 Intraceuticals experience and expanding the brand's awareness worldwide.

O2 Intraceuticals facial treatments are available at EL Hotel's Wellness Room by appointment.
