WHO'S THAT GIRL?

MADONNA'S CAREER HAS SPANNED THREE DECADES, AND THE WORLD'S PREMIERE POP STAR LOOKS JUST AS RAVISHING TODAY AS SHE DID WHEN SHE WAS ROLLING AROUND IN TATTERED LACE ALL THOSE YEARS AGO. SO HOW DOES SHE DO IT? WE ASKED THREE OF HER BEAUTY INSIDERS TO REVEAL THE MATERIAL GIRL'S MATERIAL.

STEVEN TAPP

COLORIST ARGYLE SALON & SPA, L.A.

How long have you been working with Madonna?
A little more than five years.

Madonna has changed her hair color countless times, but her most recent blonde has stuck. Why do you think that is?
Even though it has been so many different shades of brown, copper, and many, many shades of blonde, the most recent blonde has a lot of dimension and varying tones that give it that great pop.

What are your favorite products to maintain her color?

I love René Furterer Kerite Intense Nutrition Oil prior to highlights and shampooing. I also use their Okara 2 Phases No Rinse Conditioner. Madonna loves the smell and the shine it gives her blow-dried hair.

Any tips for people looking to change their hair color?

I think taking a friend and going to a wig shop to try on shades that you think you might want is smart, and it can be so much fun.

Close upon greatness.

MICHELLE PECK

FACIALIST INTRACEUTICALS INTERNATIONAL, SKIN SPECIALIST

How long have you been working with Madonna?
I've had the honor of working with her for two years.

What are her skincare issues, if any?
Madonna has flawless and beautiful skin. I have simply aided her in the process of maintaining it, hydrating it, and keeping it radiant and glowing.

What exactly are the IntraCeuticals oxygen infusing treatments you've been using on her?
The treatment is a system that uses hyperbaric pressure (oxygen pressure) to infuse serums into the skin. The serums are composed of antioxidants, amino peptides, and nano hydrators that are super-moisturizing and address skin issues like acne, rosacea, premature aging, and severely dry skin.

How do you combat travel-weary skin on tour?
Traveling wreaks havoc on everyone's skin. My favorite product to use on the road is our Blue Hydration Gel, because it has the most concentrated amount of hyaluronic acid in it, which is hydrating on the plane. And our Regeneration Serum is Madonna's constant travel companion.

GINA BROOKE

MAKEUP ARTIST ART DIRECTOR FOR SHU UEMURA

How long have you been working with Madonna?
For four years.

How is her beauty routine different on and offstage?
Madonna doesn't really wear much makeup when she's not performing. As for her beauty routine, she takes excellent care of her skin, both externally and internally. Her skin is gorgeous in fact, like porcelain and much better than models 20 years younger.

What are some of her favorite Shu products?
The hydrating Moisture Eye Zone and Moisture Face Blisks. They're amazing and the great thing about them is they're loaded with vitamin E and pro-vitamin B5 so they not only hydrate your skin but they calm puffiness and work as an anti-bacterial against blemishes.

What look would you love to try out on her that you haven't been able to yet?
It's endless really... I would love to replicate an old picture by Cecil Beaton, or even better shoot her very '60s Sam Haskins style.

CELEBRITY SKIN

Mr. Jagger would readily admit that countless women have had him, or, in their mouths, but now, thanks to Susan Peonick, anyone can have him on theirs. Peonick takes advantage of our fascination with rock stars with her new line of dual-ended lip colors, each one inspired by and named after a musical legend. Besides Mick's scarlet-headed Forty Licks, there is a coral Java Piece Of My Heart, a bubbly-pink Red Do You Think I'm Sexy, a velvety burgundy Steve Go Your Own Way, and finally a totally nude Jimi Faye Lady Red assumed, these lip colors are the healthier way of going mouth-to-mouth with most rock stars. \$9
