BEAUTY ON shesaid

The 'M' Facial

Madonna is a style chameleon with appeal that's spanned three decades. And, whilst her look may have changed, her skin has remained youthful and radiant. Her secret is the Intraceuticals Infusions 'M' Facial. In fact, Madonna has become so fond of her treatment that she keeps an oxygen machine in each of her homes, so the treatment is on hand no matter what country she's living in.

Madonna's make-up artist, Gina Brooke, insists on all her clients having an Intraceuticals treatment before make-up is applied to achieve the perfect canvass, and Madonna is no exception.

The 'M' Facial - Madonna's treatment of choice is a fantastic combination of the Intraceuticals Rejuvenation Infusion and the Atoxylene Infusion® to ensure each section of the face gets exactly what it needs. The treatments use serums combined with topical hyperbaric oxygen, to infuse the serum into the skin making sure it works from the inside out for an immediate and long-lasting effect. The Intraceuticals Rejuvenation Infusion serum has a base of hyaluronic acid - an ingredient found naturally in the skin - that is renowned for its superior benefits as an ingredient carrier. It is combined with and carries vitamins A, C and E and green tea - a serum packed with antioxidants which help fight free radicals. This is applied to the main areas of the face, neck and chest while the Atoxylene Infusion® that targets expression lines and wrinkles is used around the eye area.

The Atoxylene Infusion® serum is a formulation derived from natural amino acids which result in visible line smoothing without accompanying paralysis which can be found in some treatments. This treatment provides a topical alternative to anti-wrinkle injections without needles or pain. It targets expression lines and wrinkles, assisting in the prevention of new line and wrinkle formation.

Gina Brooke, Madonna's make-up artist, is known to use the best and most innovative products on the market. Gina discovered, after intensive research, Intraceuticals is unlike any other skin treatment existing today. Gina believes taking care of your skin is the foundation to beautiful make-up. It was for this reason that Gina introduced Madonna to Intraceuticals, and she's been a devoted fan of the treatment ever since. Madonna herself says, "I love the treatments and so does my face".

The 'M' Facial will leave the skin's surface glowing, visibly reducing the appearance of fine lines and wrinkles while underneath the serum stimulates regeneration of new cells, elastin and collagen production. Gina Brookes continues, "Madonna ensures that she has the treatment before any major photoshoot or performance to make sure her skin is what it's renowned for - flawless!"

Gina's top three reasons for insisting on using the treatment are:

- 1) Intraceuticals Infusions hydrate and clear the skin of blemishes
- 2) Intraceuticals Infusions use hyperbaric oxygen to help diminish the appearance of fine lines and wrinkles
- 3) Intraceuticals Infusions are a necessity to smooth and prepare the skin for make-up application
