

## TARGETING: DULL LIFELESS SKIN

A common occurrence, especially in the winter months...your skin isn't overly dry, it just looks, well, dead, for the lack of a better word. Your complexion is gray and your attitude is starting to match....

Luckily, new science involving oxygen infusions can help brighten that dull complexion, breathing new life into your skin...and hopefully, your attitude!

### INTRACEUTICALS Opulence Collection

This line utilizes a 3-step process of hyaluronic layering to restore the skin's natural protective barrier while infusing oxygen into the skin. Start with the cleanser, and then move on to the hydration gel, followed by the brightening cream. You can start to notice brighter skin in as little as a week!
